The Reason Why

Ayer's Pills are so popular is, that while always reliable as a cathartic medicine, they never leave any ill effects. This is because they are purely vegetable, and entirely free from calomel or any other dangerous drug. In all cases, therefore, whether the patient be old or young, they may be confidently administered.

In the Southern and Western States, where derangements of the liver are so general, Ayer's Pills have proved an inestimable blessing. D. W. Baine, New Berne, N. C., writes :

"I suffered a long time with stomach and liver troubles. I tried various rem-edies, but received no benefit until I commenced taking Ayer's Pills. These pills benefited me at once. I took them regularly for a few months, and my health was completely restored." Throughout New England, next to

ung diseases, Stomach and Bowel Complaints are the most prevalent.

Dyspepsia

and Constipation are almost universal. Mr. Gallacher, a practical chemist, of Roxbury, Mass., who was long troubled with Dyspepsia, writes:

"A friend induced me to try Ayer's "A friend induced me to try Ayer's Pills, and, after taking one box without much benefit, I was disposed to quit them; but he urged perseverance, and, before I had finished the second box, I began to experience relief. I continued taking them, at intervals, until I had used eleven boxes. Suffice it to say, that I am now a well man, and grateful to your chemistry, which outstrips mine."

The head and stomach are always in sympathy; hence the cause of most of those distressing headaches, to which so many, especially women, are subject.

Mrs. Harriet A. Marble, of Poughkeepsie, N. Y., writes that for years she was a martyr to headache, and never found anything to give her more than temperary relief, until she began taking Ayer's Pills, since which she has been in the enjoyment of perfect health.

Ayer's Pills, PREPARED BY

Dr. J. C. Ayer & Co., Lowell, Mass, Sold by all Druggists.

Herit will win and receive public recognition and praise. Facts, which are the outcome of general experience, growing through years of critical and practical test, become as reoted and immovable as the rock of Gibraltar in public opinion, and henceforth need no further guarantee as to their genuineness. The indisputable fact that Swiff's Specific is the best blood purifier in the world, is one of these immovable Gibraltar rock facts of which we have speaken, and every day's experience roots this convection deeper and deeper in public opinion. Every class of one saling and profession, including the medical profession, have beene voluntary testimosy to the remarkable virtues of 8. S. B. and its infrailible efficacy in curing all diseases of the histor. These testimonals are on file by the thon-sands, and open to the inspection of all. Now come, unsolicited, two distinguished intentiers of the thearing profession, who gratefully testify to the wonderful curative quintilies of the specific in their individual cases. Their testimonials are herswith submitted to the public without further comment—let them speak for themselves. The lady is a member of the famous Thalia Theorie Company, of Chicago. The gentlemen is a well known member of the New York Thalia Theatre Company. Both are well known in themireal circles in this country and in Europa.

Charlotte Randow's Testimony. NEW YORK, May 3, 1987.

New York, May 3, 185.
Swift Specific Company, Atlanta, Ga.:
Gentlemen Having been annoyed with pimples, ecuptions and romainess of the skin, from bad condition of my blood, for more than a year, I med a leading preparation of sarsapurilla and other advertised tensel tensels to ne effect. Then I consulted a prominent physiciam, and from his treatment received no benefit. I then concluded to try the 8.8 x remody for the board, and five or six packages, by a thorough eradication of my trouble and restoring smoothness to my skin, have made me happy, and I cheerfully give you this testimonial for such use and publicity as you what or make of it.
CHARLETTE RANDOW,
122 Howery, near Canal Street,

Hugo Hasskerl's Testimony.

The Swift Specific Company, Atlanta, Ga.:
Gentlemen. For two years I had a severe case of redema. I used tar some, sulphur some, and various offer remedies, and was prescribed for by numbers of physicians, but found no rollet. At last I determined to the seven or eight isother have thoroughly refleved me, seven or eight isother have thoroughly refleved me, you can see this certificate in any manner you wish.

books is an experience of failure.

monplace books serve for citations or for she is entitled to remain a virgin; if not, the record of your own thoughts. But she must consent to the bonds their sphere is a limited one, and they matrimony. As in the other cases, but have the same trouble as the scrapbook - [ew outstrip their lovers. All the Year it is almost impossible to index them. The scrapbook and the commonplace book, though they are good things in their way, are thus of real practical serv ice in the hands of but few. A thing Remarkable Instance of Political Fore High streets pasted is a thing speiled. A common-

place book entry is apt to be a thing hid-den and inaccessible. Is there no better way? There is a much better way. There is

brain of an Italian librarian some years chale slavery from its limits prior to the for-ago, and one which has been applied with "matten of a state constitution?" your cuttings, notes, pampblets, mem-oranda, under ten numbered primary the north heads; then subclassify them decimally, according to the amount of matter under each head to be classified. In this subdivision each number will represent a subdivision each number will represent a sub-ject, and the subjects may be subdivided indefinitely. For an ordinary collection (186), giving the victory to the Republicans of cuttings begin with ten boxes, each and making Lancoln himself president, box to contain its appropriate topic. The ten topics are in order as follows: 00. General Works: as bibliography, eyels-

ural Science: mathematics, astronomy, physics, chemistry, geology, botany and the rest. 60. Useful Arts: medicine. engineering, technology, commerce, building, etc. 70. Fine Arts. 80. Literature, 90. History.

These are the ten serviceable divisions

of all knowledge, according to the scheme.

To each is alloted a box. When any box overflows, add as many subdivisions in after which it is put into a wire cage and left new boxes as are needed. Thus, if under in sen water till it is washed clean. The finest 80, Literature, there is an excess, the subdivision 81 will be for American literature. 82 for English, 83 for French, and so on. Each division can be subdivided as often as is needed, even into several places of hundred who uses it knows how it is made. decimals, as in Columbia College library; and each number will express the character of the subject, according to the elaborate scheme which Mr. Dewey has printed. But the beauty of the system is that it applies as well to the smallest as to the largest collection. You may not The scheme is equally applicable to a

the largest library.

The classification is one that I have tried with most successful results. The ready for the finisher, number on each box indicates the subject down to any required degree of particuwill be found, and as a given subject expands the overflow goes into new boxes.

I should explain that in filling the state of a boxes. it will often happen that some of the articles seem to fall equally well under two divisions. In this case, to avoid any posdivisions. In this case, to avoid any possible doubt, I have recourse to a catalegue of entry slips, in which I record the place of the doubtful article. Suppose, for instance, I have a pamphlet on "The History of Science." To make sure I have a pamphlet on better them under the chest—it doesn't have small first make sure I have a pamphlet on better them and stick them in their hair with history of Science. To make sure I have a pamphlet on better them and stick them in their hair with history of Science. To make sure I have a large small better them and stick them in their hair with not combatted at the outset. We have all the wish it use them alive. When the duty for immediate action is clear, is always unwise. Established to a triple of a resort to medication. Diseases of the kidneys and bladder are often of the kidneys and bladder are often of the history of Science. should not search first under History and then under Science before finding it. I enter this pamphlet under the author's

this way the work of indexing is reduced to a minimum; for nine-tenths of the articles classified find themselves, as it were, and the index is needed only in a few cases like this I have mentioned. Another great advantage of this plan is that nothing is pasted down. Everything is movable, and everything can be used in new combinations. - Titus Munson Coan in The

THE STORY OF A SLAVER.

Scartless Expedients of a Man Now Living in Boston.

The other day I heard a story from a sea captain who has been all over the world and finally settled near Atlanta, the best place, he says, he has ever found. Among the scafaring men he knew before the war was a captain that had been a slaver. Once he had a cargo of 300 slaves, sailing with them from off the coast of Africa to Cuba. After a few days' sail be saw he was chased by a United States man of war. If he was caught with the slaves the penalty was death for him and his crew, and his cargo was worth \$200,000. So he had two incentives to get away, and made his preparations for either event-escape or capture. He hung the heavy iron cable or chain that holds the anchor all around the hull of his vessel, on the outside, just below the edge of the deck. It was held by some cleats. These cables are so heavy that a man can lift only about two feet of one. Then he had the 300 naked negross brought on deck and each one's wrists crossed and tied fast. They were then placed along the gunwales, facing outward and leaning over, and a strong cord fastened the hands of each one to this heavy iron cable just below them on the

Then the captain awaited the result of the race. He had on every stitch of canvas his poles could carry. If he could run till dark he hoped to dodge the steamer and be out of sight before another day. But the sun did not go down fast enough, and the steamer came on too fast. There was at last no hope of escape. The crew stood ready with axes: the captain raised his hand, and in an instant every cleat was knocked loose. There was a sudden jerk, over went the negroes; there was for an instant a fringe of 600 black heels in the air, and cable and negroes were gone to the bottom. Commodore Maury says the pressure of water at great depths is such that fishes cannot go there to devour and chemical decomposition cannot take place. these negroes are down there yet, still tied in a circle to that iron cable, with

For fifteen years they have steadily gained in favor, and with sales constantly increasing have become the most popular corset throughout the United States.

The Guality is warranted to wear twice as long as ordinary corsets. We have lately introduced the G and R-H grades with extra long waist, and we can furnish them when preferred. Highest awards from all the world's great fairs. The hat medal received is for first degree of merit, from the late exposition held at New Orleans.

While scores of patents have been found worthless, the principales of the Glove Fitting have proved invaluable. which he this time successfully landed and sold in Cuba. On his return to Boston, however, he and his mate fell out, and the mate told on him. The captain ra way to Cuba and was not prosecuted. After awhile his friends succeeded in getting a pardon for him from the president, and he returned to Boston, where he now resides—wealthy, happy and respected. He told this story to his old friend, who told it to me. As for the poor negroes jerked over the gunwales so suddenly headforemost into the water forever—well, they were captured while operate stage? "No, but I always trying to capture some other negroes to sell, and only suffered the fate they were trying to impose on others of their own kind.—Atlanta Constitution.

What is Neurasthenia?

It is nervous exhaustion. It is more com- and mon in the United States than any other country. Physicians say that from the procrastinate if he perceives the renal orequitor north, and from the arctic regions south, nervous diseases reach a climax in Bitters are peculiarly adapted to overcome the temperate zone, the zone in which Eu-ropean civilization exists. Neurasthenia is a without exciting, the kidneys and bladder comparatively modern disease, and is supposed to arise from the increased activity, the nervous strain under which the American people live. In Europe nervous diseases classed under this head are but little known; but our people are every day becoming more and their organizations more delicate. It is partly due to our climate, but principally to American enterprise.

What Became of the Hero of Fort Sumter. Maj Anderson, after the surrender of Fort Sumter, was appointed a brigadier general in the regular army, and sent to command the department of Kentucky. The state was the department of Kentucky. The state was then indoubt whether to become Union or non-union. Gen Anderson was averse to action which was liable to irritate its population and found himself constantly between two SOZODONT. Analysis discloses bothing imparts in this preparation. The ladges buy and found himself constantly between two fires. The unpleasant responsibility of his position and his ill health induced him to turn over the command to Gen. Sherman, that it is a most effective abid to beauty. The turn over the command to Gen. Sherman. Anderson never took an active part in the war afterward. In 1870 he went aboard in search of health, but failed to find it. He died Oct. 26, 1871.

Did Halleck Arrest Grant? After the capture of Fort Donelson, Gen. Grant went to Nashville (where he had sent Neison's division), as he avers in his memoirs, for the purpose of conferring with Gen. Buell, whose advance also occupied that city. Halleck reported to McClelian, then commander in chief, that Grant was absent from his command, which was "in a worse state of demoralization than the Army of the Poto-mac after Bull Run." McClellan gave his consent to Gen. Grant's arrest, but it does not appear that the arrest was ever made. After some correspondence between Grant and Halleck . he matter was dropped.

Whereabouts of Jenny Lind. Jenny Lind-Mme. Otto Goldschmidthe first great vocalist that ever came to America, is now 67 years old. She is settled in England, where she has resided since 1856. Otto Goldschmid, whom she married, was the musical director of her orchestra when she sang in America. Recently she had charge of a choir and the female voices have had the benefit of Mme. Goldschmid's training. On the establishment of the Royal College of Music she was appointed one of its professors, but has recently resigned.

"Witness My Hand and Seal." In the early days only a few scholars and priests knew how to write. It was then customary to sign a document by smearing the hand with fisk and impressing it upon the paper, at the same time saying "Witness my hand." Afterwards the seal was introduced as a substitute for the hand, and was often placed beside the hand mark, the two form ing the signature. This is the origin of the expression used on modern documents.
